

# Encourage career exploration with MajorClarity by Paper™

Paper's evolution into a full educational support system (ESS) brings career and college readiness into focus. MajorClarity by Paper helps students in grades 6-12 explore careers, choose relevant classes, earn Micro-credentials, research colleges and financial aid, and so much more. It helps align every student's education with a successful career—regardless of their postgraduation plans.

## Engage more students with career exploration

With MajorClarity, students complete short personality assessments to identify careers aligned with their interests and preferred learning styles. Then, we suggest career simulations where learners can test-drive career pathways and provide postsecondary exploration tools to help them discover relevant colleges and training programs.

## Drive course and pathway alignment

With additional access, students can also take charge of their course planning, connecting their interests with your district's pathways and career and technical education programs.

Counselors and staff can use MajorClarity to manage college applications, transcript requests, and transition planning. Likewise, they can automate the creation of state-mandated individualized learning plans.

## Encourage students to explore postsecondary options

For students with college in mind, MajorClarity offers a comprehensive research database. Students can explore various colleges, compare their offerings, and get a full look at everything from tuition to admission and graduation rates. Students can also explore financial aid and grant packages filtered by need and career pathways.

**TIP FOR DISTRICTS:** Have students complete the “Soft Skills/General Employability” Micro-credential, a self-paced course built with the National Technical Honor Society.

---

## Get the most out of your classroom

MajorClarity provides a comprehensive set of tools that help teachers and counselors boost students’ engagement on the platform, including:

- Premade career readiness lessons
- Subject-specific activities
- Journal prompts
- Tutorial videos
- Live chat support for students, staff, and parents
