

# Inspire learners to build fluency and math skills

Paper's Educational Support System provides students 24/7 access to essential practice resources, personalized support, and preparation for careers or college. Our on-demand practice tools focus on three foundational skills crucial for long-term success: fluency, vocabulary, and math.

## Benefiting learners and educators alike

### Practice for every skill level

Students have access to all practice exercises—even those outside of their grade band. This allows learners to forge ahead when they're feeling confident or brush up on past concepts when they need a refresher.

### Support for teachers in the classroom

Paper's independent practice can keep advanced students engaged during class time, helping teachers focus on students needing more individual attention.

### Ready-to-go exercises

These on-demand tools are quick and require no prep, making them ideal entry and exit tickets in the classroom or homework exercises.

## What types of practice opportunities are available?

### Paper Missions

- A fun, interactive hub of questions that cover key K-12 vocabulary and math skills (think algebra, geometry, and operations).
- Missions are packaged in an engaging short format that includes videos, animations, and plenty of confetti-filled praise.
- Students can choose to explore one problem at a time or complete a practice set (which includes a group of problems focusing on a single concept).

### Paper Reading

- This reading practice tool drives literacy outcomes by listening to students as they read aloud and providing immediate data-driven feedback.
- Teachers can quickly create assignments, or students can read independently.

### PaperClips

- These short videos pack in learning moments, helping students review academic concepts, learn fun facts, and explore new subjects.
- Students can browse the clips at their leisure or watch and reflect in small groups.
