

1

You can now speak aloud during a Live Help session, and have your voice transcribed to text.

**2**

To turn your voice into text, simply click on the sound wave icon in the chat to start "recording" your speech.

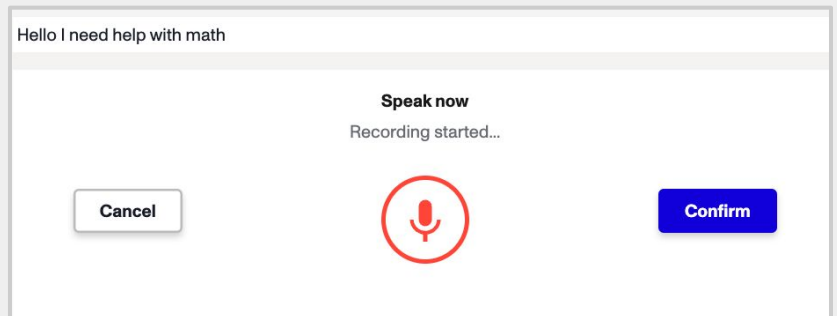

**You might have to enable microphone permissions.*

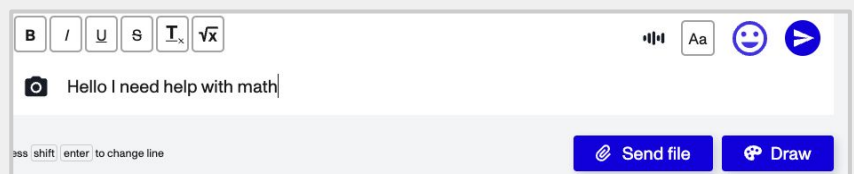

3

Next, you'll see your spoken words turn into typed text on the screen.

**Be sure to speak slowly*

**4**

You can then choose to edit the text before sending, or simply send as-is if the text is ready to go.

**5**

Your tutor will see the message appear on screen as if you wrote it using your keyboard.
